Architectural Woodcarvings

The time has come to embrace
the **Modern** classic

ART FOR EVERYDAY™

Art For Everyday™ manufactures original woodcarvings in North America. We use the finest wood and provide innovative design details for custom cabinet makers, architects and designers. With over 950 ornamental carvings and turnings, we provide designers the flexibility to create their own unique designs.

Our products encourage the creative flexibility to compose custom design combinations using the finest select hardwoods and craftsmanship. We passionately blend art and architecture to achieve new designs and innovations.

A Modern Take on Historical Revival.

As an Interior Architect, adapting historical form to modern sensibility was the motivation behind this collection. It is exciting to know that we have infinite capacity to reinvent architectural woodcarving and transform it to present without losing its sense of the past. Importantly, we were able to marry creativity with technology, to make items that look like one-of-a-kind artistic creations, yet have the ability to produce in quantity.

All parts of this collection are related to each other and seamlessly work together in combination to complete the overall design impression. The Modern Classic concept allows designers to use these beautiful pieces and make their own signature designs.
