Trim Head Screws

Our Trim Head screws are designed for applications in which the head needs to be as small as possible. These screws resemble finishing nails in both appearance and function. The small head size allows it to be used to discreetly attach moldings and trim to millwork, cabinetry and crafts.

EURO SCREWS

DEERWOOD FASTENERS

Our Euro Screws are available in a nickel finish that perfectly matches the “European” hardware used on your projects. These small screws have a Blunt Type B point that allows them to have maximum holding power in a pre-drilled hole. The aggressive deep thread design insures maximum holding power in MDF and Particle board as well as hardwoods.

Wood Fastener Guide

DEERWOOD FASTENERS

Types of Screw Heads

-  **Flat Head** - Flat top surface with a countersunk bearing surface.
-  **Pan Head** - Flat bearing surface, a semi-elliptical top surface, and cylindrical side surface.
-  **Truss Head** - Low profile semi-elliptical top surface with flat bearing surface.
-  **Oval Head** - Slightly rounded top surface with a countersunk bearing surface.
-  **Round Washer Head** - Built-in washer provides a larger bearing surface.
-  **Fillister Flat Top Pan Head** - Flat top pan head design allows for a deeper recess and optimum bit engagement.
-  **Modified Truss Head** - Low head profile, larger load bearing surface.
-  **Undercut** - Head designed to seat properly in undersized countersunk holes.

Types of Screw Recesses

-  **Phillips** - Most common recess used in woodworking.
-  **Phillips - Slot** - Available with standard and metric machine screws.
-  **Robertson® Square** - Increasing in popularity due to more positive holding while driving.
-  **Recex®** - Square Phillips combination drive allows positive driving and after market serviceability.
-  **Pozidrive** - Available with Euro screws.

Wood Fastener Guide

DEERWOOD FASTENERS

Measurements

Types of Screw Threads

Deep Thread - Single lead with a wider, deeper thread for use in soft woods and man-made boards.

WoodMaster™ Thread - Patented serrated tooth thread provides easy driving and greater holding power than type 17 points while reducing wood splitting.

Twinfast Thread - Double lead thread for use in hardwoods and tough applications.

Tapping Type A Screw Thread - Standard single lead thread and commonly used with pan, oval, truss and short length flat heads.

Machine Screws - Standard and metric thread for knobs, pull and metal parts.

Hi-Lo Thread - Greater holding power for hard and soft woods.

Types of Screw Points

Sharp Point - Available with twinfast and deep thread screws (30-35 degrees).

Type A Point - A gimlet point and normally available with tapping screws.

Type-17 Point - A special sharp fluted point to enhance wood penetration.

Type B Point - A blunt point available with machine, euro and firmit screws.

Factory Tour Step by Step

DEERWOOD FASTENERS

Take a factory tour....Step by step

We've been manufacturers of quality fasteners since 1908.

1.

We begin the manufacturing process with high quality carbon steel or stainless steel wire.

2.

Each coil of wire is traced by lot number to insure quality from start to finish.

3.

The wire coils are fed into a heading machine that forms the head style, recess and cuts the headed blank to the proper length.

4.

The unhardened carbon steel or stainless steel wire is fed through the header machine and the wire is forced, using multiple blows, into heading dies that form the head style and recess.

Working to the highest standards to insure our consumers a quality product.

Factory Tour Step by Step

PAN AMERICAN
EST. 1957™
SCREW

DEERWOOD FASTENERS

5.

Headers are lined up together so one operator can manage several machines at once. Operators continually check head dimensions, recess depth, blank length, etc. and compare these measurements to the drawing specifications to insure the fasteners are within specification.

6.

The headed blanks are fed from an overhead tote into a feeder bowl that supplies the threading machines.

7.

Now we thread the headed blanks. Headed blanks are fed through a vibrating hopper and down a feeder rail to line them up to be threaded.

8.

The hoses shown are to ventilate the smoke and cooling oil fumes out of the factory to provide a safer working environment.

9.

Threading dies are made to our exacting specifications. Each one is a matching set.

10.

The headed blanks are fed down a feeder rail and lined up to accept the threading dies. One threading die remains stationary while the other is pushed forward by the machine to roll the thread onto the headed blank and form the point of the screw.

11.

The threaded and headed parts are now fed into a tote and are ready to be sent to heat treat. The only other operation that may be needed now is to send these unhardened parts to the shank slot machine to have a Type-17 cutter point cut into them.

12.

After heat treating many of our screws are plated with a decorative plating or plated with yellow zinc dichromate and then coated with a special coating process that provides excellent corrosion resistant properties.

13.

Our quality control department constantly tests the fasteners for drive torque, breaking torque, driver bit fit, bend and yield, salt spray hours, etc. to insure our customers receive the highest quality fasteners available.

Now that you have experienced “The Deerwood Difference”...

Take a few minutes to review what our other companies have to offer.

Please contact your Deerwood customer service representative to learn more about these additional products available to you.

Pan American Screw founded in 1957 as a US division of Robertson, Inc. of Canada. We specialize in fasteners for the woodworking industry, construction industry and window and door industry.

Deerwood Fasteners has been a leader in the kitchen cabinet and furniture industry since 1972. They offer a wide variety of fasteners for the woodworking and institutional furniture industry. Deerwood also offers a complete packaged fastener program.

Sure Drive USA founded in 1976 specializes in construction fasteners sold through wholesale distribution, lumberyards and OEM direct. A wide variety of fasteners from decking screws to hidden deck fastener systems are sold nationwide. A lot of our products are private labeled for our customers.

Co-Op Screw is a key supplier to the window and door manufacturing industry. We specialize in 410 and 18-8 stainless steel fasteners and offer specialty thread styles designed for vinyl and wood window assembly applications. Co-Op was founded in 1976 and became part of our group in 2010.

Atlas Bolt & Screw– The industry leader Pre-Engineered, Steel Component and Post Frame construction fasteners. Manufacturing facilities in China and USA with distribution centers in Ashland, OH, Flat Rock, NC, Houston, TX and Salem, OR to support large fabricators and roll formers across the US and Canada.

Western Builders Supply– Big Timber™ construction fasteners sold exclusively to lumber yards, home centers and farm and ranch stores throughout the US. Our complete line of star drive general construction and structural lag screws are known throughout the industry for their high quality fasteners and competitive pricing structures. Headquartered in Billings, MT they became part of the Pan American family in June 2015.

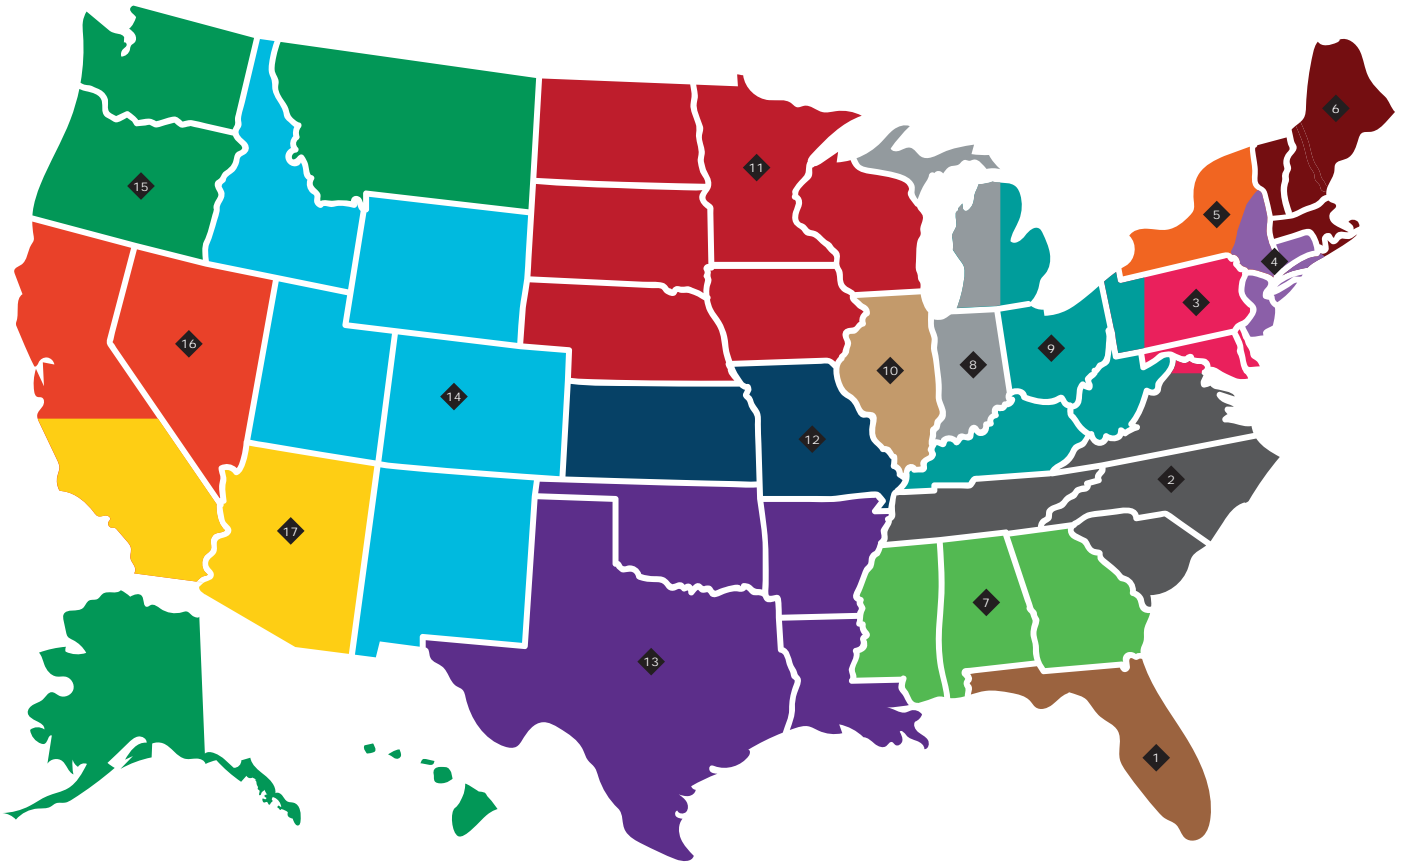

Tenn-Tex Plastics, Inc. is a leading manufacturer of high-quality injection-molded plastic parts focusing on product development and customer service. Tenn-Tex Plastics specializes in furniture, kitchen & bath cabinetry, and hardware distribution markets. Their products include specialty drawer slide brackets, a patented QuikTRAY Rollout System, Shelf Clips, Shelf Supports, Institutional Shelf Supports, Corner Braces, Glue Blocks, False Front Clips, Glass Door Retainers, Slide Brackets for Undermount and Side Mount Slides, Brackets for Ball Bearing Slides, Cover Caps, Shipping Clips, Spacers, Inset brackets, Toe Kick Endcaps, Paint Caps, Furniture Glides and much more.
