Technik für Möbel

Hettich

Thank you for choosing Hettich!

Outstanding engineering achievements. Entrepreneurial courage. And a reliable instinct for the needs of the market. These are the cornerstones of Hettich's success – the same ones we've been building on for over 125 years. Back in 1888 Karl Hettich designed a machine that revolutionized the production of anchor escapements for Black Forest cuckoo clocks. In 1928, August Hettich turned towards the furniture industry with an innovative production line for piano hinges.

Encouraged by further achievements, brothers Paul, August and Franz Hettich set up a new company at Herford in 1930. Kirchlengern became headquarters in 1966. Our company has been a wholly owned family business ever since – now with Dr. Andreas Hettich at the helm as the fourth generation managing director.

Introducing:
Hettich USA

Cabinet and room dividing hardware technology is our competence and passion. Our products set the benchmark for function, quality and comfort. The brand Hettich symbolizes a strong partnership with the Kitchen and Bath, Residential, Office, Distribution and Appliance industries. Our today is dedicated to designing a successful tomorrow for cabinets as well as for room dividing systems. Our products answers the call for efficient, functional, and flexible solutions from urban apartments, family homes, to office complexes. Through our brand values (Quality, Innovation, Reliability and Closeness to customers) we will pave the way to future successes. Hettich is a German based, family owned, global supplier of hinges, drawer slides, drawer systems and sliding/folding hardware. We have production facilities located in North America, Europe and Asia. TopLine Grant is proudly manufactured in our North American facility located in Buford, Georgia. A true benefit for our North American partners through production turnaround and shortened delivery times.

Whether space efficient sliding door systems for small flats or spacious solutions for the loft apartment, sliding door solutions from Hettich make spaces more attractive, practical and versatile.

In modern, spacious interior design, sliding door systems are the perfect creative element for any room. Because large surface doors impressively pick up on purist room aesthetics and create versatile practical/living spaces.

Yet sliding doors also lend an attractive simplicity and sense of space to small rooms while optimizing storage efficiency.

Discover home living with a new, individual touch and get the ultimate in ergonomic practicality and use of space. Make more of your rooms – with sliding door systems from Hettich.

Opens and closes very heavy doors in silence:
The first soft stop system for doors weighing up to 147 kg (325 lbs).

Gentle movement:
Minimal opening force provides practical convenience. A simple movement of the hand is all it takes to open and close the door gently.

Protects Fingers. Gentle on doors:
Silent System automatically slows the door down as it closes, bringing it to a gentle halt. All very safely.
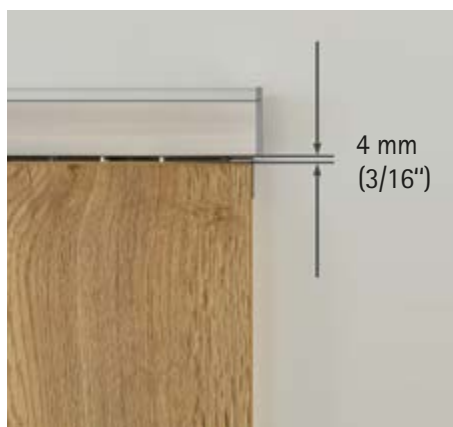

Barrier-free without trip hazard:
No profiles on the floor. A small floor guide is all it takes to keep the door straight.

A perfect design supplement:
TopLine Grant SD/HD/XHD

762 mm
(30")

Narrow doors, full convenience:
Soft opening and closing capabilities
for doors with a minimum width.

4 mm
(3/16")

Design perfectly complemented:
Narrow reveals can be produced
by the low head profile system.

**Well balanced design, perfect
convenience:**
Silent System invisibly integrated
in the profile.

Easy to install:
TopLine Grant SD/HD/XHD

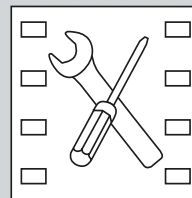

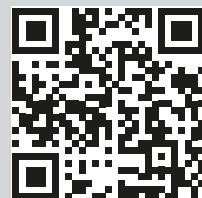

http://www.hettich.com/short/6bcfac

End stop and activator are easy to fit:
Just screws on to the track. No pre-drilling necessary. No irritating aluminum chips in the profile. Positioning easily adjusted.

Takes up very little space:
Silent System can be inserted into the profile with a minimum of space.

Easy installation:
Have a look on our installation animation for Grant SD / HD / XHD.

Architectural sliding door system

The right system for your door weight

Grant SD
Up to 68 kg
(150 lbs)

Grant HD
Up to 147 kg
(325 lbs)

Grant XHD
Up to 227 kg
(500 lbs)

Wall or header mount

Header mount
For traditional header mounted pocket and sliding doors

Wall mount
The wall mount bracket is ideal for single and bi-parting applications

Final design tuning for wall mount applications

Endcap
for wall mount applications without fascia

Endcap
for wall mount applications with fascia

Choose your gap–design

Basic
For pocket doors and applications with wooden or no fascias

Fascia
Hardware is hidden by an aluminum fascia

Low profile
Hardware is hidden in the door. Small gaps up to 4 mm (3/16")

Choose your level of comfort

With Silent System
The fully concealed Silent System brings softly cushioned action to sliding doors in every direction: in opening and in closing
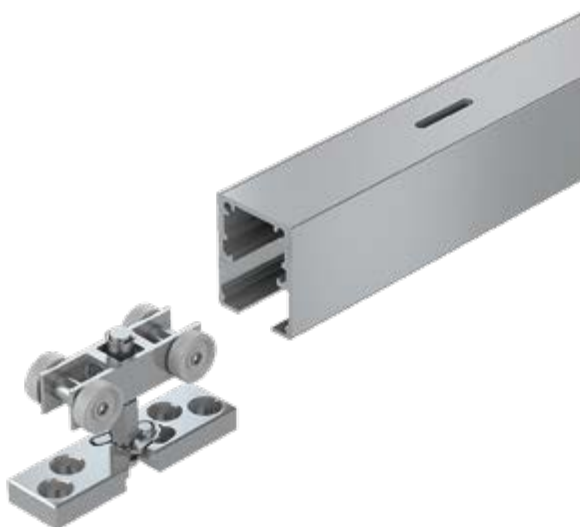

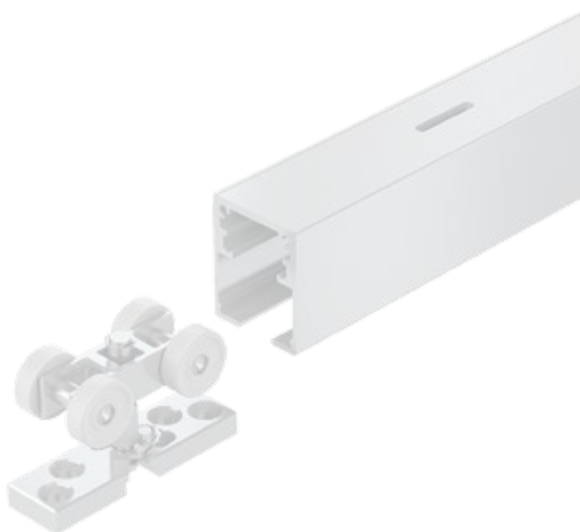

Keep the door aligned
Floor guide

Without Silent System
End stops hold door in place

1	Track

Tracks in several lengths

2	Hardware set

Choose low profile hardware for a sleek and elegant look or standard hardware

3	Wall mount bracket

For wall mount applications

4	Fascia

Hide your gap with a fascia

5	Endcap

Final design tuning with endcaps

Architectural sliding door system
▸ **TopLine Grant XHD**
▸ **System components**

All inclusive sets

▸ Set contains all components for a 1-door application with basic gap design

Set comprises:
▸ **1** Track (aluminium, anodized)
▸ **2** Hardware set

Advice:
▸ For longer track application order hardware set and track separately
▸ You can update your all inclusive set with
  3 Wall mount bracket
  4 Fascia
  5 Endcaps

Length mm	Length ft.	Order no.	PU
1829	6	9 235 673	1 set
2438	8	9 235 674	1 set

Flexible sets

1 Single track XHD

▸ Aluminium, anodized
▸ Easy attachment due to pre-punched screw slots

Advice:
▸ Screws are not included. Recommend 31.8 mm (#10 x 1 1/4'') pan-head

Length mm	Length ft.	Order no.	PU
1829	6	9 199 510	1 ea.
2438	8	9 199 511	1 ea.

4879	16	9 199 514	1 ea.

2	Hardware set - Choose between the low profile hardware set for a sleek and elegant look or the standard hardware set

2a	Low profile hardware set XHD

▸ Creates a sleek and elegant look: Minimizes the gap at the top of the door with a minimum reveal of 4 mm (3/16'')
▸ Ideal also for restricted headroom application
▸ Aluminium construction
▸ Set contains components for a 1-door application

Set comprises:
▸ 1 floor guide
▸ 2 end stops
▸ 2 carrier assemblies – each assembly contains:
    1 channel
    1 support insert
   1 carrier
    1 end cap
▸ Wrench
▸ Fixing screws

Advice:
▸ Door thickness min. 35 mm (1 3/8")
▸ Please order profiles separately

3 | Wall mount bracket XHD

▸ Ideal for heavy and extra heavy duty single and bi-parting applications where traditional header mounted pocket and sliding doors are not desired or cannot be structurally installed
▸ Suitable for 25 mm (1'') to 50 mm (2'') doors
▸ Aluminium, anodized

Set comprises:
▸ 1 wall mount bracket
▸ Wall mounting screws
▸ Fixing screws and nuts for attaching the track

Advice:
▸ Please order running profile separately
▸ End stops required on all wall mount applications

Length mm	Length ft.	Order no.	PU

Architectural sliding door system

‣ **Technical information**
‣ **Calculating door weights**

Adjustment to different material thicknesses

The table entries refer to 19 mm thick material.
The table entries must be multiplied by a factor in order to adjust to material of different thickness.

Material thickness mm	Factor
15	0,79
16	0,84
18	0,95
19	1,00
20	1,05
22	1,16
23	1,21
26	1,37
29	1,53

Formula for conversion
Door weight = weight for door in thickness of 19 mm from table above x factor
Example
Chipboard door
H x W x D = 2000 x 1800 x 16
Weight shown in table for this door size, but material in a thickness of 19 mm = 47.9 kg

Convert to 16 mm door thickness using factor of 0.84 as shown in table on left
Door weight = 47.9 kg x 0.84 = 40.2 kg

Calculating weights of doors in alternative door materials

Density of various materials in kg/m^3

Material	Density kg/m^3
Acrylic glass	1200
Aluminium	2700
Balsa wood	120
Concrete	2400
Lead	11300
Iron	7800
Gypsum plasterboard	900
Glass	2600
Hardboard	1000
Hardwood, wet (beech)	900
Hardwood, dry (beech)	800
Cork	300

To calculate the weight of doors in alternative door materials, the specific density of the door material must be taken into consideration.

Example

Door made of acrylic glass with a density of 1200 kg/m^3
Door height: 2000 mm, door width: 1800 mm, material thickness: 6 mm

Door weight [kg] 25,9 kg	=	Height [m] 2	x	Width [m] 1,8	x	Material thickness [m] 0,006	x	Density [kg/m^3] 1200

Hettich products must work safely and reliably. They must be strudy and strong, easy to install and user friendly. This requirement profile demands ambitious research and development – and meticulous quality management.

In complex test procedures, we test every Hettich product for qualities such as durability, resistance to changing climatic conditions, safety and ergonomics.

The promise we give to our customers is: "fit and forget": once installed, Hettich products simply get on and do their job day after day after day. For furniture manufacturers, Hettich quality guarantees the reliability and long life of their own products. And the lasting satisfaction of furniture buyers.

Architectural sliding door system

▸ **Technical information**
▸ **Quality criteria**

Tailored Quality

The quality of Hettich sliding door systems is monitored constantly. Hettich fittings comply with the various quality standards of the markets our customers operate in.
As for Hettich, it is important not just to meet the quality standards of the market, but to surpass them.
Therefore all fittings need to pass an extended test range Hettich fittings are required to pass.

Passed Quality Standards
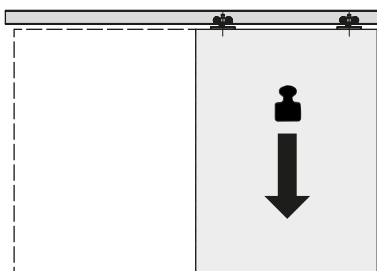

▸ BHMA A156.14
▸ DIN EN 1527
▸ DIN EN 15706

Endurance Test

The door, loaded with the dimensioned weight, is opened and closed at a defined speed and is required to withstand 100,000 cycles.
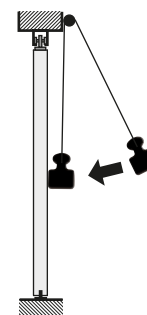

Static Load Test

The door is loaded with the double of the dimensioned weight over a specific time. All fitting components and tracks are required to withstand these loads without any remaining deformation.
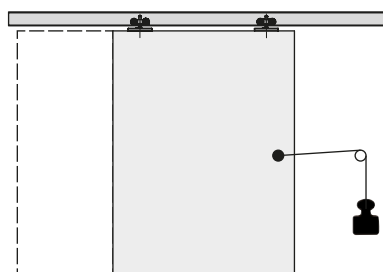

Horizontal Impact Test

A specific force is applied in horizontal direction to a defined position of the door. The door and all fitting components needs to withstand this action without any damage breaks or cracks impairing operation.
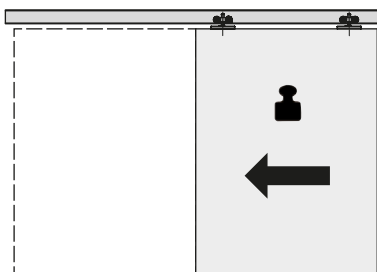

Stop Test

The door is closed all the way with a defined pulling force and needs to withstand this action for a set number of times.
Tensile load 4 kg (Level 3).

Opening Force Test

The opening force is identified on a door loaded with the dimensioned weight.

Corrosion Test
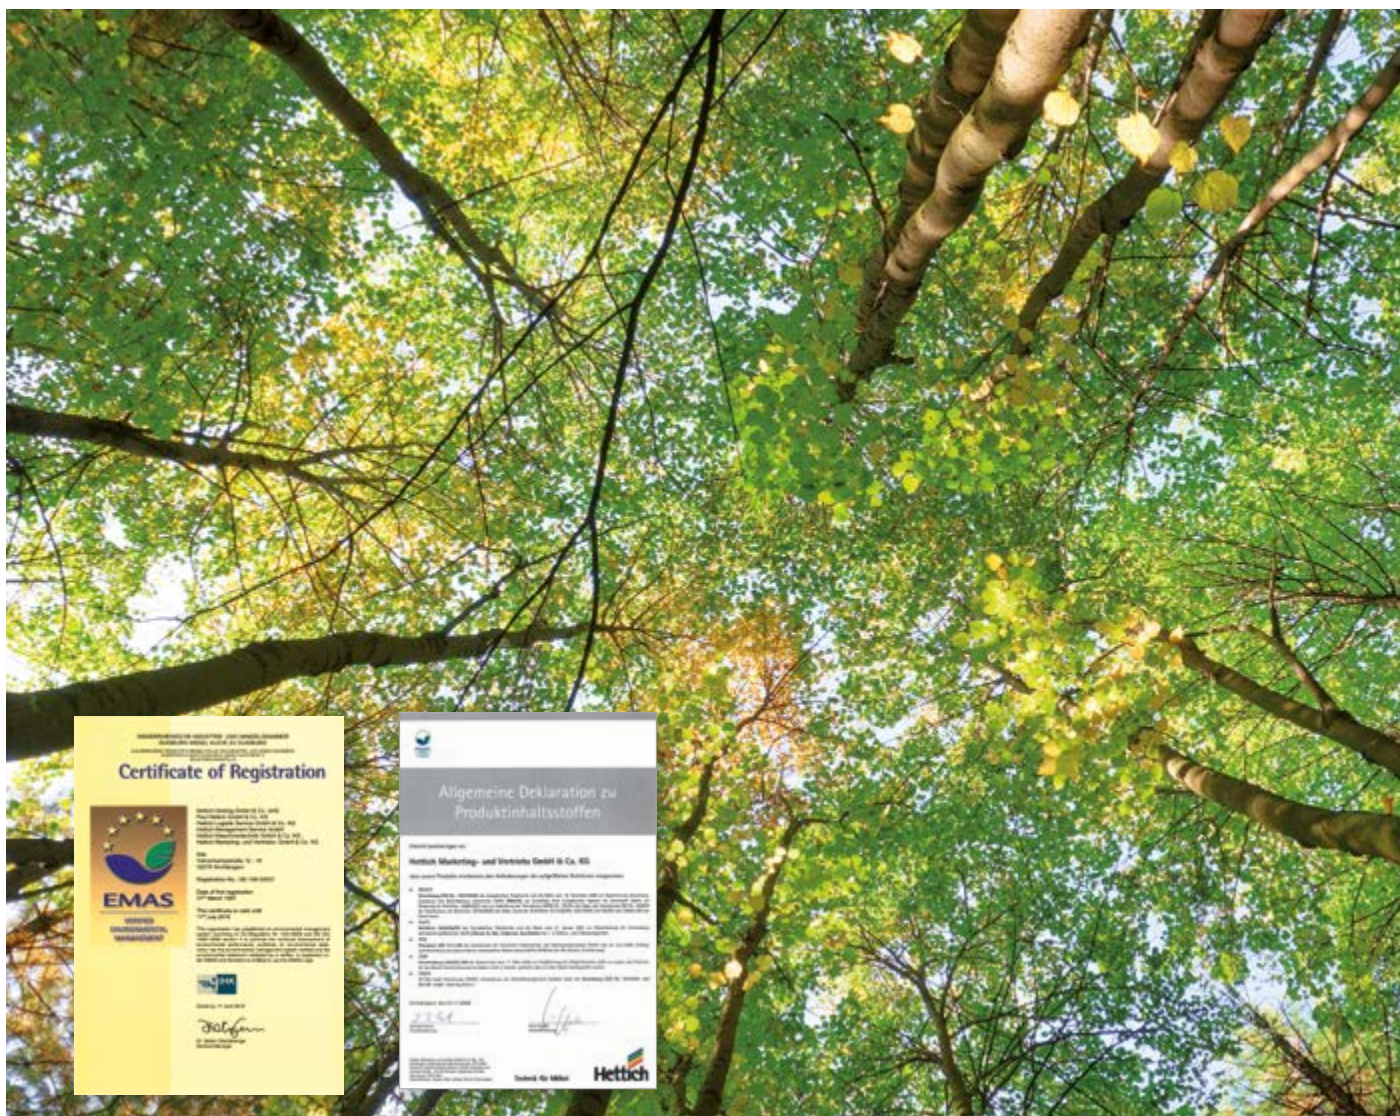

All fitting components and tracks are required to be resistant about corrosion caused by humid or saline air.

Classification according DIN EN 1527

Hettich and the environment: Committed to responsible practice, active protection, innovative thinking.

Hettich accepts responsibility for the world we live in. This awareness defines the strict policy of environmental management we practise. Our environmental officer has taken personal responsibility for these aspects throughout the group of companies over a period of many years. In addition, a separate environment committee has been established for each production site. We regard statutory provisions as minimum requirements. At significant sites we also implement the stringent EMAS Regulation. And we drive forward developments that in future will help to save even more raw materials and support the necessary endeavours towards sustainability.

Hettich standard for product materials

Hettich underpins its commitment by applying an internal standard for product materials. This ensures that every product – from production to disposal – satisfies all environmental requirements. Hettich products are durable. Appropriately foresighted, our rigorous standards are formulated to ensure that international legislation is met as well. This provides a reliable basis for marketing furniture worldwide.

Hettich environmental management

In 1996 Hettich started introducing effective environmental management systems under the stringent EMAS Regulation (currently: EC Regulation No. 761/2001, including EN ISO 14.001/2004). This not only enables us to improve our environmental performance on a broad front but also achieve a high level of safety which, not least, also benefits our customers. This is why we also require our suppliers to meet the necessary minimum standards of environmental protection, industrial safety, health care and social welfare.

The results achieved in the drawer runner and drawer system product segment at the Kirchlengern operation illustrate the impressive effects these measures have and verifiably demonstrate our tireless endeavours to translate words into action:

Relief to the environment between 1997 and 2008:

Specific water consumption: 56 per cent
Specific power consumption: 21 per cent
Specific heat consumption: 84 per cent
Specific CO_2 emissions: 29 per cent

Application

Unless otherwise specified in this catalog, Grant Folding and Sliding Door Hardware is suitable for use in both residential and commercial climate controlled environments.

System capacities

All systems conform to ANSI/BHMA as specified Panel thickness and loading capacities are stated per each system as a maximum weight per panel and where required a minimum or maximum panel thickness.

General Technical Conditions
It is generally understood that:

It is not allowed to mix other suppliers hardware with Hettich products.

Each product to be used in accordance with the specified application and installed in accordance with the instructions supplied.

With systems which are suspended without a permanent frame which encloses the open ends of the running profile, an endstop, supplied by Hettich, must be used in accordance with the instructions.

Screw fixing points and loading information specified in this catalog assume proper attachment of hardware to materials providing a sufficient axial pullout force of ≥ 2,000N in accordance with ASTM D1761-12.

Screws are provided in all hardware kits, installation of screws other than those provided by Hettich should be in accordance with specified sizes and conforming to ANSI/ASME B18.6.4.

General Terms of sale and delivery

All products and services will be provided exclusively on the basis of our General Terms of Sale and Delivery published on our website at www.hettich.com.
