

Bore and Dowel Construction

High-Quality, State-of-the-Art Joinery

DBS offers Bore and Dowel construction of drawer joints. We use only high quality production equipment to produce this detail.

Dowel is considered a premium grade corner joint according to most regulatory agencies. It is especially advantageous for knock down applications due to the ease of assembly. We recommend this corner joint for all types of cabinetry, office furniture and residential furniture

Specifications

- Dowels are 6mm x 30mm hardwood
- Dowels are pre-inserted in the front and back of the drawer
- Dowels are 32mm center to center installed
- Dowels are set 20mm into the front and back of the drawer
- Drawer sides are full length and the ends are drilled to accept the dowels
- Top edges of the sides are 1/16" taller than the front and back of the drawer
- Standard bottom construction is let in on four sides and includes hot melt on assembled boxes. Bottom mount construction is also available
- We recommend using this construction with all types of plywood and pre-laminated materials
