

# EKABLACK

## THE NEXT GENERATION ABRASIVES

**EKABLACK** is the latest generation of coated abrasives from Uneeda. Thanks to its Antistatex bonding system, it combines the capacity for high rates of material removal with the ability to produce excellent surface finishes. Together with an open coat grit distribution and its unique antistatic effect, it reduces clogging to a minimum, contributing to the best possible sanded finish, while delivering a substantially longer lifetime over its competition.

### ADVANTAGES

---

- Latest Antistatex Technology
- Up to 50% longer lifetime on hardwood sanding
- Superior finish and consistant scratch pattern on white wood and lacquer
- Universal application with minimal set-up time

### TECHNICAL SPECIFICATIONS

---

<b>Backing:</b>	F paper
<b>Bonding:</b>	Resin over resin
<b>Antistatic:</b>	EKAMANT ANTISTATEX
<b>Coating:</b>	Open
<b>Grit range:</b>	80-320

#### Materials

- Hardwood
- Veneer
- MDF
- Lacquer

#### Availability

- Narrow belts
- Wide belts
