KNAPE & VOGT®

Contents

Drawer Slides 2

For more than a century, we've studied and mastered the mechanics of motion hardware and drawer slides. We offer a wide variety of disconnects, extensions, movement designs, bearing options, and evolving choices for mounting, detent, finishes, and more. Our in-stock options are extensive with solutions at every price point and for every level of application duty.

Shelving 64

Knapé & Vogt's shelving hardware has been helping to store and support people's most important possessions for over a century. Standards, brackets, pilaster standards, clips, supports and flanged brackets—we offer U.S.-made solutions that range from elegant and decorative to oversized and heavy-duty.

Closet and Specialty Hardware 93

For cabinetry, storage and woodworking projects, Knapé & Vogt offers attractive and durable specialty hardware, including pulls, fasteners, catches, mirror clips, glass clips, door locks and joint fasteners.

Index 113

How to Choose a Drawer Slide

Design Factors

Each drawer slide model has unique performance characteristics that are determined by the intended application for which it is designed. There are many different slides available for a variety of applications; choose the slide that best fits your application.

Length. Slide length is a key factor. Typically, the longer the slide, the less load it will carry and vice versa.

Travel. Travel is the maximum extension compared to the closed length. Most slides are either 3/4 or full travel. Special extension lengths are available with modified travel. In general, the longer the travel, the less load a slide can carry and vice versa.

- A 3/4 travel slide has extension to approximately 75% of its length.
- A full travel slide has extension approximately equal to its length.
- An over travel slide extends beyond its length.

Width. Drawer width affects the rigidity of the installation. In wide drawers, the slides will rack from side to side. Excessive racking can degrade performance and shorten slide life.

Action. The type of mechanism used to carry the load affects slide performance, motion, noise, and the “fit and feel.” KV slides use rollers, ball-bearings, friction fits, or any combination in achieving movement. In general, superior action requires more rollers or ball-bearings to support and distribute large loads.

Size. In addition to a slide’s load rating, the physical size of the application is a consideration.

Drawers having unusual width, depth, or height especially require careful consideration to determine which slide best suits the application.

Operating Clearance. Drawer slides operate within a specified clearance (the space between the drawer and the case). The clearance must be strictly held within the specified tolerances. When the clearance is too wide or too narrow, the slide will experience additional forces and stresses that will reduce its expected performance and life.

Case Goods Construction and

Materials. Slides perform better when mounted in rigidly constructed furniture. Construction with soft or thin materials often results in flexing. This causes the drawer to rack from

side to side, placing considerable stress on the slides. Do not use drawer slides as support members carrying structural loads.

Application Factors

Location of Pull. The location of the drawer handle affects slide performance. Center pull positions “are recommended because they permit a balanced pull force evenly carried by both slides. Side or edge pulls put more force directly on one slide than the other, causing the two slides to progress at different speeds. The additional force required to open and close the drawer hinders performance and shortens slide life.

Installation. Most slide designs require installation in a single position. Carefully study the application before installing the slides in different or abnormal positions.

1. **Orientation.** Slides should not be installed in an orientation other than for their intended usage. For example, a slide designed for Side-mounting may lose 75 percent or more of its load-carrying capacity if mounted flat underneath a drawer.
2. **Location.** Drawer construction, pull position, and type of load are all key considerations to determine the best location to fasten the slides.
3. **Balance.** Most slides are designed for use in pairs. For example, suspending a load from just one side (cantilevered load) causes excessive stress and may result in premature slide failure.

Fastening. For best performance, slides require proper fastening. Use the recommended fasteners in sufficient quantity to properly secure the slide. Too few fasteners can cause the slide to pull loose and cause damage. Abnormal fastening methods should be carefully evaluated, because methods such as gluing, riveting, or welding may have unanticipated effects.

Load Factors

Alignment. Slides run in a straight motion. The more precisely the slides are aligned, the less chance they will work against each other.

Load Ratings. KV designates drawer slides in “Pound Class” categories, and uses dynamic (rather than static) loading to determine load ratings. The “Pound Class” categories are used within the slide industry as general guidelines for drawer slide selection. These categories are not the same as actual load ratings. Load ratings vary based on slide length, application, and case goods construction.

The categories provide a reference point in selecting which slide may fit a particular application. The Pound Class designations are not intended as a substitute for actual product testing. Proper slide selection may be significantly different from the Pound Class designation, depending on the application or other use factors. Representative testing of the selected drawer slide in the fully configured application is the only way to assure proper performance, durability, and safety.

Static Loads. A static load is a resting load without any motion. Static load capacity is significantly higher than dynamic load capacity.

Dynamic Loads. A dynamic load is a load in motion. When a dynamic load gains momentum, it induces more stress and fatigue. Slides must withstand more forces when in motion than when still.

Dynamic loads affect the life and performance of any slide. Other load factors affecting performance are:

1. An evenly or unevenly distributed load
2. A centered or off-centered load
3. The load’s center-of-gravity relative to the slide’s centerline-of-travel
4. The number of cycles
5. The speed or frequency of cycles
6. The length of the cycle stroke
7. The percent of travel
8. The stopping force and distance

Abnormal Loads/Vibration.

Shipping, abusive loads, and impact loads—even in short duration—put large stresses on the slide and can cause immediate or premature failure. Excessive or continuous vibrations can also reduce slide performance and life.

Corrosion. Excessive humidity, salts, or other chemical agents can corrode the finish and attack metal or plastic components. The effects may be immediate, or they may develop over time.

Lubrication. Knappe & Vogt lubricates slides at the factory. However, contaminants such as dirt, filings, sawdust, paints, etc. can rapidly break down the effectiveness of the factory-applied lubricant.

Temperature. Extreme high or low temperatures can cause lubricants to thin or gel. Extreme temperatures caused by equipment such as finishing ovens can deteriorate a slide’s plastic and rubber components.

Finishing. Over-spray from stains, paints, varnishes, or other finishing agents may degrade the quality of a slide’s “fit and feel.” These types of chemical agents can also attack plastic, rubber, and metal slide components. It’s important to properly mask or otherwise protect installed slides before finishing furniture and cabinetry.

Proper slide specification and installation are keys to long and problem-free operation. To help you select the drawer slides best-suited to your specific applications, Knappe & Vogt offers a free consultation service. KV also offers a “no charge” testing service.

KV strongly recommends that manufacturers test representative samples of the complete application. Appropriate industry standards should be followed to assure proper performance, durability, and safety.

NOTE: Knappe & Vogt’s testing service does not include product cost nor freight cost to or from the KV test laboratory. Product is properly disposed of shortly after testing, unless otherwise requested.

8400 Series Drawer Slides

1. Push-in button for drawer disconnect is ergonomically designed for easy drawer removal.
2. Traditional and 32mm hole pattern supports industry standards for safely fastening slide in place.
3. Reversed flex tabs allow improved slide performance with side clearance tolerance adjustments.
4. Rolled ball-bearing raceway allows lateral loads to be carried by ball-bearings and not transferred to bushings sliding on metal.
5. Mounting hole is provided for face frame applications to eliminate the need for a separate bracket.
6. Access holes allow for drawer adjustments at full extension without removing drawer.
7. Lacquer finish provides superior corrosion resistance.

Self-Close Series Drawer Slides

Self-close slides use spring technology to close a drawer.

Models and Descriptions:

8417: Self-closing full extension

8419: Self-closing over travel drawer slide

8400RV: Heavy-duty self-closing full extension drawer slide

Features and Benefits:

- Self-close feature assist with the closing of a drawer and is fully integrated into the slide
- RV version has stronger springs to ensure closure in mobile applications

8450FM Soft-Close Drawer Slide

The new KV8450FM Series is a step forward in side-mounted ball-bearing drawer slides. The KV8450FM series incorporates state-of-the-art soft-close technology. The fully integrated soft-close module brings drawer box to a smooth, quiet and secure closure.

8450FM Series Features and Benefits

- Patented KV design incorporates dampening cylinder with balanced spring technology
- Soft-close module is fully integrated into an KV8400 style slide with same side clearance allowing cabinet makers to migrate directly to KV8450FM series products with no set up changes
- Exceeds KCMA, BHMA and BIFMA standards of performance: over 50,000 cycles including the soft-close module

8400 Full Extension Box or File Drawer Slide

Features

- 32mm hole pattern with direct access mounting
- Lever disconnect for easy drawer removal
- Non-handed design
- Recommended maximum drawer width 24"

8500T Lateral File Drawer Systems

Features

- Patented integrated anti-tilt mechanism
- Uses high-strength cable that laces through the drawer slides and snaps into place, allowing only one drawer to open at a time
- Accommodates drawers on 12" (±1/2") vertical centers
- Non-handed quick disconnect rail
- Designed for use on lateral file applications where a drawer anti-tilt feature is needed
- Full extension slide with maximum 36" drawer width

Mounting: Side
Action: Progressive movement on ball-bearings
Load Rating: 150 lb. class
Height: 5.15" [131mm]
Clearance: .50" + .03" - 0" on each side
Finish: Anochrome (ANO)

Bracket diagram for Mepla hinge

Bracket diagram for KV hinge

NOTE: 3/4 Full Overlay applications require 8091 slides. Full Overlay Kit and 8091 slides must be attached to a partition wall.

Full Overlay Kit Installation Requirements

- Overlay kits require the use of a KV 8091 series slide
- Overlay kits require the use of a pinion shaft
- Overlay kits require the use of a partition wall within the cabinet

KV Hinge Kits

1. **Depth Adjustment Cam**
The horizontal (lateral) adjustment range is 6mm.
The depth adjustment range is 3.1mm (-0.5mm to +2.8mm) for all hinge bases.
2. **Horizontal (Lateral) Adjustment Cam**
The horizontal (lateral) adjustment range is 6mm (-1.5mm to +4.5mm for 35mm cup hinges; -0.5mm to +5.5mm for 40mm cup hinges), while maintaining a constant gap behind the door.
3. **Vertical (Height) Adjustment Cam**
The vertical (height) adjustment range is 4mm (-2mm to +2mm).

Features

- Three-way cam hinges for easy adjustment
- Horizontal, vertical and depth changes can be made without loosening any screws
- Four types of hinges for a variety of application

Clearance: 8080 HKS standard hinge: 1-21/32"
8080 HKF free swing hinge: 1-21/32"
8080 HKL partial overlay hinge: 1-37/64"
8080 HKX extra thick door hinge: 1-37/64"

Finish: Black (BLK), Nickel (NP)

Adjustable Wall Shelving Quick Reference Guide

Knappe and Vogt pioneered the development of the modern standards and bracket system of adjustable wall shelving, and we're still the leader in selection, quality and innovation. With one of the industry's widest selection of systems and component accessories, chances are we make a shelving system just right for you. To aid your selection process, we've created a comparison chart that lists the vital characteristics of our standards and bracket systems, as well as available finishes and accessories. If you still have questions or need more details, please contact KV Customer Service.

Roll-Ezy Ball-Bearing Track Systems

Complete Assembly

P992 Large Glass Door Track Assembly Kit

- Includes:** (1) 993 Upper Channel, (2) 995 Shoe, (2) 997 Carrier, (1) 999 Lower Track
- Origin:** Made in the USA
- Packed:** 1 set per carton
- Features:** For large glass door applications, for 1/4" thick glass installations

Complete Assemblies	
Product	Installation Opening Width
P992 ZC 36	36"
P992 ZC 48	48"
P992 ZC 60	60"
P992 ZC 72	72"

Installation Notes & Recommendations:
Knappe & Vogt does not recommend butt-joints and/or openings longer than 12 feet.
We recommend that the height to width ratio for glass doors should not exceed 2:1.

953 ZC 144 Top Door Divider

- Size:** 5/8" width x 5/8" height x 144" length
- Finish:** Zinc (ZC)
- Origin:** Made in the USA
- Packed:** 1 each
- Features:** Pre-coated steel upper T-guide for wood framed installations; for use with 1/4" glass doors only; for large glass door applications

993 ZC 144 Upper Channel

- Size:** 15/16" wide x 5/8" height x 144" length
- Finish:** Zinc (ZC)
- Origin:** Made in the USA
- Packed:** 1 each
- Features:** Upper channel for top and ends of opening; wide divider maintains door position; for large glass door applications

995 ZC 144 Door Shoe

- Size:** 21/64" wide x 7/16" height x 144" length
- Finish:** Zinc (ZC)
- Origin:** Made in the USA
- Packed:** 1 each
- Features:** Lightly curved bottom for free rolling position on ball-bearings; for 1/4" glass, scant or full; for large glass door applications

997 ZC 144 Ball Carrier

- Size:** 3/8" wide x 17/32 height x 144" length
- Finish:** Zinc (ZC)
- Origin:** Made in the USA
- Packed:** 1 each
- Features:** Ball-bearing carrier has free rolling balls on 3" centers; unique design creates two point suspension between shoe and lower rack; for large glass door applications

999 ZC 144 Lower Track

- Size:** 1" wide x 1" high x 144" length
- Finish:** Zinc (ZC)
- Origin:** Made in the USA
- Packed:** 1 each
- Features:** Balls ride freely on curved anvil with no contact against sides of lower track; for large glass door applications

NOTE: For each foot of opening use 1' of upper channel and lower track and shoe (plus 1" per door for overlap), with 1-1/2' of carrier (1-1/2 times door width for each door). Glass is cut 1-1/4" lower than height of opening.

Knappe and Vogt Limited Warranty

Limited Lifetime Warranty for Commercial Business Products

15 Year Limited Warranty for Ergonomics Products

This warranty is given to the initial purchaser of new commercial and ergonomic products purchased from Knappe & Vogt Manufacturing Company and its subsidiaries. The warranty covers defects in materials and workmanship. The warranty does not apply to defects resulting from misuse, damage or abuse, normal wear and tear, accident, modification, improper installation or maintenance, third party materials or damage during shipping. The warranty is not transferable and does not cover any subsequent purchasers of the products.

Definitions of the specific warranty time periods by product can be obtained from Customer Service at 1.800.253.1561. The warranty time period begins on the date of purchase for all products. Applicable warranty time periods are based on one 8-hour shift per day usage, and warranty time periods are adjusted and shortened proportionally for any multiple shift or excess usage.

During the warranty period, Knappe & Vogt, will, at its option, repair or replace any defective product with a comparable product or component. This limited warranty is for repair or replacement of defective products only and does not cover any other costs such as removal, installation, or other related expenses.

For warranty service, please contact Knappe & Vogt Manufacturing Company, 2700 Oak Industrial Drive, Grand Rapids, MI 49505, Attention: Customer Service. Information regarding the claimed defect and date of purchase of the product must be provided. Any defective product must be returned postage or freight prepaid to Knappe & Vogt.

THIS LIMITED WARRANTY CONSTITUTES THE ONLY WARRANTY FOR THE PRODUCTS AND ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, BY OPERATION OF LAW OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSLY DISCLAIMED. (Some states do not allow limitations on how long an implied warranty lasts.)

THIS LIMITED WARRANTY CONSTITUTES THE SOLE REMEDY AVAILABLE WITH REGARD TO ANY DEFECTIVE PRODUCTS. KNAPE & VOGT SHALL NOT BE LIABLE FOR ANY INCIDENTAL, INDIRECT, CONSEQUENTIAL OR SPECIAL DAMAGES, INCLUDING WITHOUT LIMITATION, LOSS OF TIME, INCONVENIENCE, OR LOST REVENUES OR PROFITS. (Some states do not allow the exclusion or limitation of incidental or consequential damages.)

Return Policy

Return Policy for special order or nonstock items:

We're sorry, we cannot accept returns on nonstock products or special order products unless there is a Knap & Vogt error — which we will be happy to correct. To return product(s), please follow these procedures:

Please contact Knap & Vogt Customer Service at 1.800.253.1561. A Customer Service Representative will assist you with getting a Return Goods Authorization (RMA) number. The original P.O. is required to receive a RMA number. Please return product within 30 days of issuance of the RMA number.

Restocking Fees:

- All resalable product returned in original resalable packaging will be assessed a 25% fee for restocking and handling.
- Minimum fee is \$25.
- All resalable products not returned in resalable original packaging will be assessed a 25% fee for repackaging in addition to the 25% restocking and handling fee.
- Above referenced fees will be waived on returns resulting from a Knap & Vogt error.

Shipping:

You are responsible for all return shipping charges to return the product unless we made an error in shipping your order, i.e., the product we shipped is not the one you ordered, or is defective.

In the US, please ship to: Knap & Vogt

Return Goods Department, 3800 Eastern Ave SE, Wyoming, MI 49509

In Canada, please ship to:

Knap and Vogt/ Vanguard, Attn: Return Goods Department, 265 Export Blvd, Mississauga, ON L5S 1Y4

- Ensure the product(s) are properly packaged to prevent shipping damage.
- Include RMA number with return.
- Ensure all products returned match quantities and products listed on the assigned RMA.

Credit:

- A credit memo will be issued upon inspection and approval of the returned product.
- Upon receipt and inspection Knap & Vogt will determine credit amount and notify you of any discrepancies.
- DO NOT make any financial adjustments to your account prior to Knap and Vogt issuing a credit memo for returned goods.
- Please allow a minimum of 15 days for us to receive and process your return.
- We will credit or refund the value of the product total and any taxes you were charged less applicable fees. (excluding delivery charges).
- Refunds will be given in the same form of payment. Adjustments to credit cards should appear within two billing cycles.

Replacement Orders:

- Any replacement orders will be charged to your account.
- A credit memo will be issued for returned products that have been approved.

RMA Status Information:

- Visit www.customercareconnection.com.
- Enter your account information.
- If you do not already have your account set up for this free service, please register at www.customercareconnection.com.
- Your satisfaction is our priority. We are happy to accept returns or exchanges for any resalable or defective products within 60 days of the shipping date.
