Walnut - Flat Cut
Walnut - Qtd.
Wenge
Zebrawood - Qtd.

Some species subject to minimum order quantities and availability. Species that are more difficult to get are marked **(limited)**.

GENERAL APPLICATION INFORMATION

All veneer should be acclimated prior to application. Ideal temperature for application is 70-80 °F. Ideal humidity is 35%. Surface must be clean, dry and smooth to ensure a good bond.

Veneer scrapers are recommended for hand application to allow for maximum pressure. "J" rollers are not recommended. Adhesive should be allowed to cure for 48 hours prior to finishing.

AVAILABLE OPTIONS

FORMWOOD® ARCHITECTURAL SPECS

Available as: Running Book or Slip Matched, Balance Book or Slip Matched, Center-Balance Matched, Random Matched, Flitch Matched, Sequenced & Numbered, End Matched.

FORMWOOD® PAPER-BACKED VENEER

Each sheet is tenderized and sanded to meet our stringent quality standards.

NBL® - NO BLACK LINE

NBL®'s patented 3-ply construction produces an extremely pliable, moisture-resistant sheet without the black edge associated with phenolic and foil backers.

DURABACK™

DuraBack™ is an alternative to traditional laminate backed veneer. It is used where solvent-based adhesive restrictions require woodworkers to use water-based glues.

FORMWOOD® 2-PLY HARDWOOD VENEER

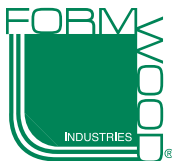

Perpendicular face-to-back construction utilizing a thin acrylic membrane to provide protection against bubbling, glue seepage and telegraphing. No unsightly edge lines, and easily bends on moderate curves in the horizontal or vertical direction.

FORMWOOD® SYNTHETIC CROSSBAND

FormWood Synthetic Crossband is designed to replace natural wood crossband while offering advantages in uniformity, smoothness, superior internal bond strength and yield.

FORMWOOD® PSA - 2' & 4' WIDTHS

FormWood PSA veneer sheets utilize the best quality 3M® Brand PSA adhesives to provide a simple and easy alternative for applying veneer without the need to use a secondary adhesive.

On architectural spec jobs, please contact your
 Charles McMurray Co. sales rep for a special quotation.

Other items are available by Special Order. All orders will have separate freight charges. Per box charge applied for all drop ship orders. 8-10 veneers per box. STANDARD LEAD TIME IS 6-7 WORKING DAYS ON SPECIAL ORDERS. SPECIAL SIZES AND CUTS WILL TAKE LONGER.
